

HDPE Ribbed Wall Pipe (Black Pipe)

Comes in a standard 6metre length double wall (Heavy Duty) pipe. Black Pipe is light and strong - rated to SN8

Geotas stocks 225mm, 250mm, 300mm 375mm, 450mm & 600mm internal diameter

The smooth inner wall surface provides excellent hydraulic flow capacity . It is also resistant to abrasion, corrosion and chemical scouring. The ribbed outer wall provides optimum strength and has the ability to support heavy loading. This form of flexible pipe has the ability to relax under stress which reduces the possibility of damage.

Light weight – easily handled by one person.

Joining Method - Easy push fit system to ensure hassle free assembly. Double End Socket and rubber ring are used together to ensure leak proof connection in gravity line applications

Internal Diameter	External Diameter
225 mm	255 mm
250	285
300	340
375	430
450	520
600	685
